Education

- Concordia University** 2027
Bachelor of Engineering - Software Engineering Co-op (GPA: 3.66/4.30) Montreal, QC
- **Relevant Coursework:** Web Services & Applications, Software Architecture & Design, Software Testing, Verification & QA & Management & Quality Control, Introduction to Deep Learning, Computer Vision, Database Systems
- Vanier College** 2023
DEC in Computer Science and Mathematics St-Laurent, QC
- **Focus:** Java (OOP), mathematics, and analytical problem solving.

Experience

- Airbus Canada** May 2026 - August 2026
Developer KPI Dashboard Mirabel, QC
- Translated business requirements from the supplier management team into clear technical specifications, delivering application features that met functional needs and performed in production.
 - Conducted user acceptance testing with end users, rapidly diagnosing and resolving bugs and usability issues based on real-time feedback to improve application reliability.
 - Used Palantir Foundry to design, implement, and host the application which is built with JavaScript, HTML, and CSS, for internal team-wide use.
- Matrox** January 2025 - August 2025
Software Quality Assurance Intern Montreal, QC
- Worked with industry-standard software such as TestRail and Jira to manage and validate software quality across features and releases.
 - Collaborated with software engineers to resolve system and quality issues affecting decoding, encoding, and transcoding operations for network streaming protocols.
 - Managed the quality of systems and features involving network streaming protocols while supporting continuous improvement in testing and defect tracking processes.

Projects

- AI Focus Tracker** | *React, TensorFlow.js, WebGazer* 2025
- Implemented a real-time user attention tracker using React, TensorFlow.js, and WebGazer for gaze and head pose analysis.
 - Analyzed interaction data to measure focus duration and distractions across varied user conditions.
 - Built dashboards to visualize focus trends and provide insights into user attention patterns.
- Peer Evaluation Form** | *Java, Spring Boot, PostgreSQL, React, JavaScript, HTML, CSS* 2024
- Implemented a full-stack application using Java, Spring Boot, and PostgreSQL for secure database storage and backend logic.
 - Built the front-end with React, JavaScript, HTML, and CSS to support student and instructor workflows.
 - Created CI/CD pipelines with automated testing and SonarQube quality checks, and developed RESTful APIs for authentication, team management, and peer evaluation.
- Pawfect Match Website** | *Node.js, JavaScript, HTML, CSS* 2024
- Developed a hostable website with Node.js and JavaScript to support the application design and business logic.
 - Created the front-end interface using HTML and CSS to enable an intuitive user experience.
 - Implemented account creation and login features, as well as animal posting and selection workflows for users.

Technical Skills

Applications: Microsoft Office: Word, Excel, PPT, Photoshop, Eclipse, NetBeans, Discord, IntelliJ, Visual Studio
Programming: Java, JavaScript, Node.js, Python, C, SQL, React, HTML, PostgreSQL, CSS
Platforms: Foundry, Google Workspace, Microsoft Teams, Zoom, Java platforms, Jira, TestRail, GitHub, Git, GitBash
Methodologies: Scrum, Agile
Languages: English, French
